

CHAFFEE

Inspection Services

- Quickly and easily create a Repair/Request List addendum to attach to the CAR form or to make a Project List.
- View the report at the same time as your clients and go over the request list on the phone.
- Protect yourself and your clients from liability by increasing accuracy and standardizing the process.

SAVE TIME - Create Your Repair/Request List Directly From the Inspection Report

We know that working on the repair addendum after receiving an inspection report can be a tedious job. That's why Chaffee Inspection Services has made it easy for you to use our inspection report to easily create a Repair/Request List and streamline the post inspection process.

The new interactive feature is viewed on the same webpage where the agent and buyers normally view the report. It is very easy to use. Just click *Create a Repair/Request List* while viewing each item and a list is generated, which you can attach to the repair addendum form. No more re-typing from the inspector's report or re-wording the inspector's comments. Reports are always completed on the SAME DAY as the inspection.

Please call us for your next inspection need. 760-889-3108.
